

Saving Your Memories

Perhaps you have a collection of LP albums, with no means to play them any more. Or a desire to have those in CD format for use in your car, or to load to a digital player. Or maybe some 45's or audiocassettes. Or have CDs converted to digital mp3 format.

On the other hand, you might have movies in VHS movies that need to be converted to DVD. Or videos you have taken and want to be able to play them in your DVD player.

Still yet, you have photos or slides you would like in digital form, for sending out for prints or for computer slide shows.

Michael Goodnight and Associates can do all of this, and more, at competitive prices. And, you don't have to risk sending your originals to some far away location (perhaps even out of the country), to perhaps never see them again.

Contact us at Mike@MichaelGoodnight.com to see how your treasures can be converted to digital, long lasting formats, today.
