

DVD and CD Duplication Services

Perhaps you've created a new game you need to distribute, a collection of documents you need burned to media, or a music CD for your band. You could burn them one at a time on your home computer, but that will take so long. I can offer batch duplication* for video, data, and music DVDs and CDs. Whether you need 10 or 1,000 I can handle your needs.

Lightscribe labeling can be done as well (except DVD-DL) with either simple text, logos, or artwork you supply.

Contact me today to see how I can help you out!
